SUMMARY

Adaptable Computer Systems Engineering graduate with practical experience in full-stack development, front-end modernization and networking. Skilled in Angular, Bootstrap, responsive design, debugging, and QA testing, with exposure to APIs, databases, and enterprise platforms. Eager to learn and grow, open to opportunities across software engineering, ICT support, systems analysis, networking, and roles beyond ICT that support continuous learning. Passionate about applying technology knowledge and adaptability to deliver effective solutions while expanding skills. But i am also open for even non-tech roles, General roles and hand working job where learning is considered.

EDUCATION

Diploma Computer Systems Engineering 02/2022 – 2026
Tshwane University Of Technology Pretoria, South Africa

- Software Development, C++, C#, and Python, Embedded Systems, Networking, Databases , Operating Systems, PLC Programming, Digital Electronics, Logic Design, Artificial Intelligence, Mathematics and System Integration.
- Applied object-oriented design (OOP), algorithm development, and data structures to develop scalable and efficient programs.
- Worked on hardware-software integration projects using microcontrollers (ESP32, Arduino, PIC) and automation systems.
- Developed strong analytical and problem-solving skills through projects involving control systems, system modeling, and AI applications in Unity

PROFESSIONAL EXPERIENCE

Full Stack Developer (TUT WIL) 01/2026 – 08/2026
Olympia HLD Cape Town,
Key Responsibilities and Contributions South Africa

- Maintained daily development environment on Linux, working with Docker, VS Code, terminal, and server setup to support application deployment.
- Contributed to a full UI facelift and front-end modernization, applying wireframes, styling forms, and implementing new features for improved usability.
- Enhanced responsiveness and accessibility using Bootstrap, ensuring seamless performance across devices.
- Implemented dark mode and redesigned navigation (side-nav) to align with modern UX standards.
- Performed bug fixing, troubleshooting, and QA testing, improving application stability and reducing user-reported issues.
- Utilized Bitbucket for version control and collaborative development, ensuring clean and reliable codebases.
- Strengthened technical expertise in Angular, HTML/CSS, debugging, and responsive design, while demonstrating adaptability and eagerness to learn.

ICT Intern (TUT WIL) 08/2025 – 01/2026
Kabelo Maintenance And Logistics Pty (Ltd) Johannesburg,
Key Responsibilities and Contibutions South Africa

- Assisted with digital document management, including merging, splitting, filing, and signing processes to support company workflows.
- Supported order tracking and delivery initiation, ensuring timely processing and accurate record-keeping.
- Helped establish online meetings and virtual communication systems, improving collaboration across teams.
- Contributed to company reviews and branding tasks, including designing and creating 3D logos.
- Demonstrated adaptability by learning new digital tools and processes while supporting day-to-day operational tasks.

SKILLS

Technical Skill

- Programming & Development: HTML, CSS, SASS, SCSS, TypeScript, JavaScript, C#, C++
- Frameworks: Angular, Bootstrap, Node.js
- Tools: VS Code, mysql, Git, Bitbucket, Docker, Terminal, Teams, Linux (Ubuntu), Github, Git,
- Database & Data Management: mySQL, Database Design
- Embedded & Digital Systems: Microcontroller Programming (ESP32, Arduino, PIC), Digital Electronics, PLC Programming
- Mathematics & Engineering Concepts: Matrices, Vectors, Linear Algebra, System Modeling

Soft Skills

- Clear communication (verbal and written)
- Kind, friendly, and approachable
- Hardworking, dedicated, and self-motivated
- Leadership and team motivation
- Team player with collaborative mindset
- Quick learner and adaptable to new technologies

CERTIFICATES

Free Code Camp
Responsive Web Design Certification

Huawei Nertworking Certification
Data Link Layer Technology Micro Certification
